EXPERIENCE

Pazago Technologies | Frontend developer

January 2022 - Present | Bangalore, India

- Crafted several interactive websites that are optimized for various browsers using Next.js, Tailwind CSS, and Chakra UI.
- Engaged in teamwork with the product and design teams to implement new features in the product.
- These are some of the products that I have worked on, among others:

Pazago

- Engineered a searchable dropdown box component with multi-select options and full keyboard accessibility.
- Developed a vital function that determines the type of shipment for tracking purposes.
- Implemented real-time chat functionality using WebSockets.

Precize (by Pazago Technologies)

- Created a wallet system for users to transact using their money within the system.
- Incorporated UPI payment functionality to provide a seamless transaction experience for users.
- Redesigned desktop website to be mobile responsive, subsequently making it accessible for mobile users that form a large part of our current user base.
- Established a CSS design system to bring flexibility and consistency throughout the UI design process.
- Refactored website code to improve performance and code quality.
- Made a custom video player with fully customisable controls and UI to offer a personalised experience to users.

Lockr (by Pazago Technologies)

- Leveraged Firebase Cloud Messaging to create a seamless push notification experience for a Flutter mobile app.
- Built a seamless wallet connectivity experience for a React.js web app using web3.js, including support for features like chain changed and account changed.
